

Travel Itinerary Planner

Help users plan their trips by suggesting activities, accommodations, and transportation options

Basic Business Requirements

- Trip Planning Interface:
 - Enable users to input trip details, such as destination, travel dates, and preferences (e.g., budget, interests)
 - Offer an interactive map that allows users to create and visualize itineraries by adding activities, accommodations, and transportation options
 - Provide a list of recommended activities, accommodations, and transportation options based on user preferences, budget, and travel dates
- Itinerary Builder and Timeline View:
 - Allow users to create and edit itineraries by adding, removing, or rearranging activities, accommodations, and transportation options
 - Offer a timeline view to visualize the trip itinerary and ensure there are no scheduling conflicts
- Packing List Generator:
 - Provide a customizable packing list generator that takes into account the user's destination, travel dates, and planned activities
 - Offer the ability to add, remove, or edit items on the packing list
 - Enable users to mark items as packed and track their packing progress

Advanced Business Requirements

- User Registration and Authentication:
 - Allow users to create and manage their accounts using email and password or social media logins
 - Offer account verification via email for security purposes
- Personalized Recommendations:
 - Suggest activities, accommodations, and transportation options tailored to user preferences (e.g., interests, budget, travel style)
 - Offer the ability to filter recommendations by various criteria, such as price, ratings, and distance from the user's location
 - Enable users to save and share their favorite recommendations
- Collaboration Features:
 - Enable users to invite friends and family to collaborate on trip planning
 - Offer a chat or messaging feature for group discussions and decision-making
