

Dear Hiring Manager,

I am writing to you to express my interest in applying for the 'Software Engineer' position listed on the Astea Solutions and Jobs.bg websites. I believe that my working experience and professional qualifications will make me a competitive candidate for this position.

I would like to join the Astea team because I enjoy working in international environment, being in contact with academia entities. I have worked for an EU funding consultancy company where one of my assignments was to create an international consortium of partners for an R&D project – 8 out of 12 partners were universities, working with them made me more interested in academia R&D approach towards innovation rather than the corporate one. Also my current employer, XX, is highly involved in R&D with academia partners.

The qualities I possess and believe would be of value to Astea are:

- broad working experience in a number of commercial projects
- broad working experience with international entities
- working experience in innovation projects
- good team player
- disciplined
- creative
- strive for continued success of the company I work for

I look forward to hearing from you at your earliest convenience.

Best Regards,

XXX
